DATE DISTR. 23 Howener 19  SUBJECT  New Radar Sets at Anti-Aircraft Installantone in the Cossen-Juenadorf and Korneuburg Areas  In the Cossen-Juenadorf and Korneuburg Areas  NO. OF PAGES  14  NO. OF PAGES  14  NO. OF ENGLS.  Common Recomb  SUPPLEMENT TO REPORT NO.  25X1X  1. In May 1953, source observed, at four different AAA emplements in the Experimental Costs with a formation of the precious are a set of the consisted of two track traffers, At one of the creations in the incommon traffer mounted only one vert call indeer.  25X1X  25X1X  1. In May 1953, source observed, at four different AAA emplements in the Experimental Anticommon Value of the Consisted of two track traffers, At one of the creations in the local content of the Consisted of two track traffers, At one of the creations at inches to the front side, while the other traffer mounted only one vert call indeer.  2. One one 28 May, source sade pholograms of the radar sets aveilable at AAA (explanements and two standows in the vertile superaturins, 2 Acoust 25 meters went of the northern gun, source sade two vires day, leaves assembled from a meat.  3. In mid-Hay, source sade belograms of a radar installation consisting of two extensions of the vertile and the common according to the content, which was seen at the formal karacke camp in Korneuburg, Austria, 4  2 Commont. The hourstone of the and explanements, which belong to the content of the make also one AA he of the case, per house of the case of the radar sets involved are believed to be of type AA he if it is to each, probably used a firm-mounted equipment. For elections of the radar set, we choose a such a firm of the different set has been also one AA he if the case, per house of the radar set, we cannot set one of the sealmented because they do not show any default. For elections of the two different works of the radar set, we cannot devices, per Amer 9, The devices		PARTIE INTELLIGENCE AGENCY	REPORT NO.  CD NO.  25X1A	
25X1X  1. In May 1953, source observed, at four different AAA explacements in the Ecasem-Muenator area, radar installations which consisted of two truck trailers. At one of the trailers will independ to the content of the content o	COUNTRY	East Germany/Austria	100 C 45700 Ph C 557473	1953
25X1X  1. In May 1953, source observed, at four different AAA emplacements in the Economic National Transfer of the AAA emplacement is not send of two track trailers. At one of the trailers the Mipoles were fitted on a vertical ladder and two horizontal ladders a tached to the front side, while the other trailers mounted only one vertical ladder.  2. On 6 and 28 May, source cade photographs of the radar sets available at AAA emplacement his 2. The two sets were mounted on bruck trailers which had a two-axis outlinger-type gan mount, circular track and two differentials and the mounted only one vertical and the front side, while the other trailer mounted only one vertical ladders.  2. On 6 and 28 May, source cade photographs of the radar sets available at AAA emplacement his 2. The two sets were mounted on bruck trailers which had a two-axis outlinger-type gan mount, circular track and two stadows in the varilies apperturations. About 25 meter was of the morthern gan, source set two wire devices assessmed from a meet.  3. In mid-May, source sude photographs of a radar installation consisting of two sets, which was seen at the former harracks camp in forrenthing, Austria, 4  2d Ca AAA Div, who enteriors of the AAA explacements, which belong to the 2d Cas AAA Div, were entered on a section of a 1:25,000 plane table size the same meeting antions were used for the emplacements have contened by Por detail states memorical earing antions were used for the emplacements that was also one AA ho 1 Mg III probably used as fire-control squipment. For sketch see Annex 8, In three of the AAA emplacements that was also one AA ho 1 Mg Mg III set each, probably used as fire-control squipment. For sketch see Annex 8, In three of the AAA emplacements that was also one AA ho 1 because they do not show any details. For sketches of the two different units of the radar sets, use Annexes 6 and 7.	SUBJECT			
25X1X  1. In May 1953, source observed, at four different AAA emplacements in the Ecosem-Wheneder's area, rader install a done which consisted of two track trailers. At one of the trailers at allows were fitted on a vertical ladder and two horizontal ladders at tached to the front side, while the other trailer mounted only one vertical ladders.  2. On 6 and 28 Mey, source cade photographs of the rader sets available at AAA emplacement ile 2. The two sets were mounted on truck trailers which that a two-axis outlegary-type gus mount, circular track and two windows in the van-like apperstructure, 2 About 25 meters west of the morthern gus, source seds photographs of the rader sets available at AAA emplacement ile 2. The two sets a were mounted on truck trailers which that a two-axis outlegary-type gus mount, circular track and two windows in the van-like apperstructure, 2 About 25 meters west of the morthern gus, source seds photographs of a rader installation consisting of two sets, which was seen at the former barracks camp in Korneuburg, Austria.  3. In mid-May, source sude photographs of a rader installation consisting of two sets, which was seen at the former barracks camp in Korneuburg, Austria.  4. Commont. The locations of the AAA explacements, which belong to the 2d Gos AAA Div, were entered on a section of a 1:25,000 plane table sites.  5. See Annex 1. See also nations were used for the separation sections are Annexes. In three of the AAA emplacements there was also one AA for 4 Mk III set each, probably used for carry-variang purposes.  CIA   2. Commont. The photographs used by scarce were not disseminated units of the rader sets, see Annexes to and 7.		057440	NO. OF ENCLS.	(A)
25X1X  1. In May 1953, source observed, at four different AAA emplacements in the Ecseen-Nuenadorf area, rader installations which consisted of two track trailers. At one of the trailers the sitpoles were fitted on a vertical ladders at atomet to the front side, while the other trailer mounted only one vertical ladders.  2. On 6 and 28 May, source made photographs of the rader sets available at AAA emplacement No 2. The two sets were mounted on truck trailers which had a two-axic outsigger-type gas mount, circular track and two windows in the van-like superstructure, 2 About 25 meters west of the morthern gan, source made shotographs of a radar installation consisting of two sets, which was seen at the former barracks camp in Korneuburg, Austria.  3. In mid-lay, source made shotographs of a radar installation consisting of two sets, which was seen at the former barracks camp in Korneuburg, Austria.  4. Commont. The locyticas of the AAA explacements, which belong to the 2d dos AAA Div, were entered on a section of a lie2,000 plane table street.  5. See Annex I, See also  nations were used for the emplacements decreased. For detail ake tches, see Annex 2 through 5. The radar sets involved are believed to be of type AA Nc 1 lk II, protably used as firm montral squipment. For sketch see Annex 3, In three of the AAA emplacements there was also one AA No 4 Mc III set each, probably used for carly-kerning purposes.  4. Commont. The photographs made by source were not dissemineted because they do not show any details. For sketches of the two different units of the radar set, we Annexes o and 7.		25X1C		
25X1X  1. In May 1953, source observed, at four different AAA emplacements in the Ecseen-Nuenadorf area, rader installations which consisted of two track trailers. At one of the trailers the sitpoles were fitted on a vertical ladders at atomet to the front side, while the other trailer mounted only one vertical ladders.  2. On 6 and 28 May, source made photographs of the rader sets available at AAA emplacement No 2. The two sets were mounted on truck trailers which had a two-axic outsigger-type gas mount, circular track and two windows in the van-like superstructure, 2 About 25 meters west of the morthern gan, source made shotographs of a radar installation consisting of two sets, which was seen at the former barracks camp in Korneuburg, Austria.  3. In mid-lay, source made shotographs of a radar installation consisting of two sets, which was seen at the former barracks camp in Korneuburg, Austria.  4. Commont. The locyticas of the AAA explacements, which belong to the 2d dos AAA Div, were entered on a section of a lie2,000 plane table street.  5. See Annex I, See also  nations were used for the emplacements decreased. For detail ake tches, see Annex 2 through 5. The radar sets involved are believed to be of type AA Nc 1 lk II, protably used as firm montral squipment. For sketch see Annex 3, In three of the AAA emplacements there was also one AA No 4 Mc III set each, probably used for carly-kerning purposes.  4. Commont. The photographs made by source were not dissemineted because they do not show any details. For sketches of the two different units of the radar set, we Annexes o and 7.				
25X1X  1. In May 1953, source observed, at four different AAA emplacements in the Ecseen-Unensdorf area, rader installations which consisted of two track trailers. At one of the trailers the different AAA emplacements in the Ecseen-Unensdorf area, rader installations which consisted of two track trailers. At one of the trailers the different AAA emplacements in the Ecseen-Unensdorf area, rader installations which consisted of two track trailers. At one of the trailers the different AAA emplacement in the other trailers mounted only one vertical ladder.  2. On 6 and 28 May, source made photographs of the rader sets available at AAA emplacement No 2. The two sets were mounted on truck trailers which had a two-axic outrigger-type gas mount, circular track and two windows in the van-like superstructure. About 25 meters west of the morthern gan, source made shotographs of a rader installation consisting of two sets, which was men at the borner barracks camp in Korneuburg, Austria.  3. In mid-Nay, source made shotographs of a rader installation consisting of two sets, which was men at the borner barracks camp in Korneuburg, Austria.  4. Commont. The hoppings of the made explacements, which belong to the 2d dos AAA Div, were entered on a seculous of a lic2,000 plane table state.  5. See hames 1, See also  mations were used for the emplacements concerned. For detail ake takes, see Annexes 2 through 5. The rader sets involved are believed to be of type AA No. 1 lk II, probably used as firm-montral equipment. For sketch see Annex 8, In three of the AAA emplacements there was also one AA No. 4 Mr. III set each, probably used for carly-warning purposes.				x
25X1X  1. In May 1953, source observed, at four different AAA emplacements in the Economi-Unemarker area, radar installations which consisted of two track trailers. At one of the trailers the difference which consisted of two track trailers. At one of the trailers the difference which deader and two horizontal ladders attached to the front side, while the other trailer mounted only one vertical ladder.  2. On 6 and 28 May, source sade photographs of the radar sets available at AAA emplacement No 2. The two sets were mounted on truck trailers which had a two-axile outrigger-type gus mount, circular track and two windows in the van-like superstructure. About 25 meters west of the northern gun, source set two wire devices assembled from a ment.  3. In mid-May, source sade photographs of a radar installation consisting of two sets, which was seen at the former barracks camp in Korneuburg, Austria, 4  (1A  1	Tors Document Conta OF THE CHIESE STATES 8. Comment. For photographs, see Annexes 10 through 12. Annex 10 shows the entire installation seen from the east; Annex 11 the transmitting and Annex 12 the receiving unit of the radar set. It is believed that radar sets of the same type, i.e. the AA No Mk II, are available at the AAA emplacements in Zossen.

Attachments: Annex 1 (map) to Army (18), Navy (4), Air (9), OCI (6), and OSI (6). Annexes 2 through 9 to all distributees. Annexes 10, 11 and 12 to Army (4), Navy (2), Air (2), OCI (4) and OSI (4).

### Layout of AAA Emplacement No 2

# Legend:

- 1 Four 85-mm AA guns
- 2 Van-like set with two horizontal and one vertical ladder. Transmitter of AA No 1 Mk II set.
- Wan-like set with one vertical ladder, Receiver of set. (For detail sketch, see Annex 8)
- 4 Range finder
- 5 Canvas-covered bell-shaped device, about 175 cm high, probably a Puaso-3 set
- 6 Radar set of type AA No 4 Mk III
- 7 Tents
- 8 Not applicable
- 9 Parked trucks
- 10 Generators

Note: The figures indicating distances in meters are estimates

Annex	3 t	25)	<b>&lt;</b> 1A

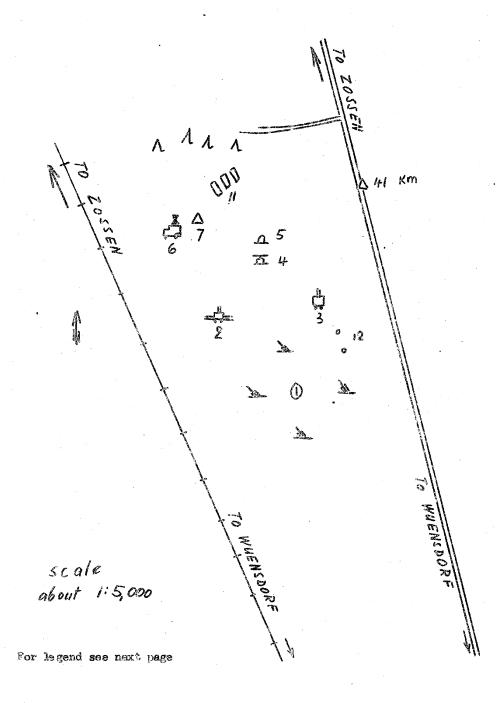

#### AAA Emplacement No 3

#### Legend:

- 1 Four 85=mm guns
- 2 Van-like set with two horizontal and one vertical ladders
- 3 Van-like set with one vertical ladder
- 4 Range finder
- 5 Canvas-covered bell-shaped set (presumably a Puaso-3 set)
- 6 Not available at the emplacement
- 7 Not available at the emplacement
- 8 Underground bunkers

Note: Sets Nos 2 and 3 were camouflaged by nets toward the south and east. Small underground bunkers were seen between the guns. The figures indicating distances were estimates.
